PROFESSIONAL SUMMARY

- An adept and passionate professional with high technical expertise along with a distinguished perspective and approach towards **efficiency**, **architectural integrity, reliability** and **punctuality**.
- Have contributed to development of **international** industry level software products including **SMSs, CMSs** & **FinTech** projects, primarily with **Java** based frameworks accumulating more than **4 years** of relevant experience in the industry, including **development**, **system design architecture** and **RnD** implementation.

SKILLS

- Web App/API Development
- Microservices/MVC architecture
- Front-End (HTML/CSS/JS)
- Thymeleaf/Freemarker/JSP
- Payment Gateway
- Websocket
- Python (NLP/Data Science/Analytics)
- SpringBoot Framework
- ISO 27001 LA
- RDBMS/JPA/JDBC
- Angular
- Live Location Tracking
- Leaflet / OpenStreetMap
- Junit/Mockito Testing
- Struts Framework
- Spring Security
- FinTech Domain
- Flutter
- Messaging System(XMPP)
- Apache Kafka/Spark
- FastAPI

EXPERIENCE

Senior Backend Developer (Aleph Labs, KL-Malaysia)   [Sept/2025 ←→ current]

- Worked in **development**, **migration** & **refactoring** of **Australian In1Bank** for C4B onboarding as well as core **financial transactions**, consisting of **25+** microservices.
- Driving the **development** of **secure** internet banking modules for **UOB (United Overseas Bank)**, ensuring compliance with strict **financial** security protocols while integrating high-stakes modules.
- **Worked** and **integrated** with **international** teams concurrently while maintaining **timelines**, **deliverables** as well as **code quality, security and efficiency** for major banking entities in **Malaysia, Singapore, Australia**.

Senior Software Developer (GSPL, Delhi-India)   [Dec/2022 → Aug/2025]

- **Project lead** in development of **CMS** (Cash Management System) software of **India** using **Spring Framework** and **Flutter+Angular** in a MVC+Microservices architecture for web and mobile applications. The system is for the complete lifecycle of an **ATM**, including installation, maintenance, cash management, security etc..
- Development and maintenance of Web Application of **SMS** (Service Management Systems) using **Struts** framework, along with RESTful services using JWS for mobile application of the same. Projects like **Carrier**, **Casio**, **Canon**, **Haier**, **Midea** etc., currently deployed in India, **UAE, KSA, Vietnam** etc.
- **Authored** organization-wide security guidelines and the PMD/Checkstyle/Code Quality implementation for the company, including **OWASP security** guidelines.
- The prime **RnD** implementor, architecting new technologies in all projects in the organisation from scratch.

Software Engineer (Credex Technologies, Delhi-India)   [Nov/2021 ←→ Nov/2022]

- Worked in development of the Jitterbit **iPAAS** software to create multiple integration connectors such as **Google BigQuery**, **JMS**, **MongoDB**, **MS Azure** etc. that integrate different softwares for data flow.

EDUCATION

Bachelor of Technology, Computer Science   [Aug/2018 ←→ Aug/2022]
GGSIPU, Delhi (9/10 CGPA)

CERTIFICATIONS AND ACHIEVEMENTS

- Google Data Analytics-{Coursera}{Credly} Spring Boot {Coursera}
- IBM Data Science {IBM/Coursera}
- ISO 27001 Lead Auditor Certified
- Artificial Intelligence- {Dell Technologies 38966}
